

CIVIL ENGINEER

An exciting opportunity has arisen in a Real Estate Development for the position of Civil Engineer.

Person Specifications

The ideal candidate must have the following:

- *A Civil Engineering Qualification
- *Excellent knowledge of design and visualisations software such as AutoCad, Civil 3D or similar
- *Proficiency in Site layout, utility designs, road construction, drainage systems design and construction, site supervision and management, regulatory approvals etc
- *Strong communication and interpersonal skills with excellent problem solving attributes

Experience

- *Experience in the construction of sewer and water reticulation, road design and road construction a prerequisite
- *Minimum of 3 years working experience in land development

Duties

1. Monitoring construction progress i.e working with clients to assess their needs and translate them into designs, equipment, or new systems. From the initial concept stage through to completion, they manage project timelines and oversee all developments.
2. Adherence to safety regulations & managing budgetary & time constraints
3. Providing technical advice throughout the duration of a construction period
4. Checking technical drawings and designs
5. Coordinating with contractors, subcontractors, clients and other persons
6. analyse the processes in place and identify areas that can be improved or find solutions to issues as they arise.

Remuneration

An attractive package is on offer and this will be discussed with shortlisted candidates.

Interested and suitably qualified candidates should submit a detailed Curriculum Vitae at least two traceable references to maud2779@gmail.com no later than 20th February 2024.
